Media for teenagers

January 22: Microsoft Tools

February 26: To be Determined

March 12: To be Determined

April 23: To be Determined

May 21: To be Determined

Teen Internet Safety Tips (for parents too)

1. **Keep Your Online Identity Secret:** Don't tell anyone your real name and address or what neighborhood you live in.
2. **Your Username and Password Belong to You ... And Only You:** Don't give your username or password to anyone.
3. **The Internet has a Great Memory ... So Keep Its Memory of You Clean:** Just because the Internet is so massive does not mean that embarrassing or risqué pictures, rude or mean comments, or illegal activities will disappear forever. Watch what you post!
4. **Be Good Online ... Just Like You Are Offline:** Writing "hate" emails, hacking into other people's computers, illegally downloading music or movies and making online threats are just as illegal on the Internet as they are in the real world.
5. **Be Extremely Careful about Meeting Someone in Person:** The FBI gives an all-out blanket warning: "Never meet anyone in person that you meet online." That said, many teens do make good friends online. You just have to be super cautious and make sure other people you know and trust also know this "new" online person.
6. **Your Parents Are Ultimately Responsible for Minors Online:** Even if your parents don't know much about the Internet, tell them what types of web sites you go to. They will probably be interested and impressed with your Internet skills.
